DOCUMENTATION

Metaminecraft – is a Play2Earn cryptocurrency game based on the famous Minecraft game.

Metaminecraft is a continuation of a new generation of beloved pixel toys with the possibility of earning cryptocurrency. You take on the role of a designer and create your own pure pixel metaverse. Remakes the world around you, YOU ARE THE CREATOR OF EVERYTHING

A new AI-powered battlefield where everyone can earn tokens through smart gameplay and contributions to the ecosystem. Players can buy nft heroes and participate in battles, get resources, develop their characters, get resources, build buildings and sell them.

Earnings are possible through the following methods:

- Participating in PVP fights with the chance to earn leaderboard awards.
- Breeding \$MMC with the purpose of reselling them on the market.
- Capture territory, building houses, developing your empire, extracting resources
- Collecting, speculation, player upgrades and resale
- Farming animals needed to help the heroes. They can be traded on cryptocurrency exchanges like Pancakeswap.
- Players can acquire a governance token, \$MMC, which represents a genuine chunk of the game world due to its governance rights and fee sharing

THE CONCEPTION

We believe in a future where play, work and pleasure are inextricably linked.

We aim to develop heroes and provide them with economic perspectives.

Most importantly, we believe that heroes and animals and collecting them can make the world a better place.

We cordially invite you to join our movement.

TOURNAMENTS AND REWARDS

The combat system of Metaminecraft is well suited for competitive play and esports due to its skill-based competitive nature. We believe this is a vital part of the future, as evidenced by how engaged players become when money is at stake.

FREE PLAYERS AND ARENAS

Metaminecraft fully engages all players in a Free-to-Play economy in which their in-game activities are rewarded in terms of money through a long-term increase in the value of their Metaminecraft.

As the player improves the abilities and value of their hero in Metaminecraft NFT, it becomes valuable and tradable on the decentralized market.

At this stage, players can either sell their playable characters to other players who wish to purchase it

BUY PLAYERS

Buy players, they can earn dozens of times more, and significantly expands the market opportunities.

All upgrades are sold to players who are willing to pay for faster progress. This is the basis of our economic approach, which allows us to create and expand the content of the game as it gains popularity.

It creates supply and demand for assets to be bought and sold on the in-game market, further boosting the economy.

METAMINECRAFT (MMC) TOKEN

METAMINECRAFT (MMC) is the Metaminecraft Universe's governance token. It is a BEP-20 token. MMC holders will be eligible for incentives if they stake their tokens, engage in the game, and vote on critical governance issues. Additionally, players will be able to earn \$MMC by participating in different games inside the Metakings Universe.

3 smart contracts will be created and integrated into one large smart contract for the convenience of players and their heroes

(MMC) TOKEN INFORMATION

\$MMC serves as the native currency for Metaminecraft. Players use \$MTK to mint characters, mint arenas, extending the lives of your characters by hiring and Buy/Sell on the Metaminecraft Marketplace.
